Dear Reader,

LUMS is gaining worldwide acclaim! After the National Outreach Programme won the Platinum Award by the Council for Advancement and Support of Education (CASE) in the 'Best Practices in Diversity, Equity, and Inclusion' category in 2021, two more scholarship initiatives have received global recognition.

The 'Give a Day to LUMS' campaign, which has to date funded the education of over 85 students, and the women's scholarship at the Suleman Dawood School of Business, that has led to a 35% increase in women's enrolment, were recognised as 2022 Best of Asia-Pacific Region Award winners by CASE. Both were initiated to help talented students access a world-class education at LUMS and through your generous support, have helped create a long-lasting impact.

It gives me immense pride to share another example of how our donors are helping create a legacy for the next generation. The 'Yusuf H. Shirazi Complex', generously funded by the Atlas Group in memory of their late Chairman, promises to bring together the agendas of sustainability and collaboration. I invite you to read more about this dynamic architectural space that will serve as a hub of intellectual exchange.

It has been possible for LUMS to provide life-changing opportunities to thousands of talented Pakistanis because of the trust of generous donors like you. Please accept my deep gratitude, on behalf of all of us at LUMS.

The Impact of Your Contributions

"I'm the first one from Duki, Balochistan, to study at LUMS and the credit goes to the National Outreach Programme!"

Muhammad Jameel

Class of 2022

Relationship Manager, Habib Bank Limited

From one of the most underprivileged regions in Balochistan, to a thriving banking career, Jameel's story is a testament to the power of education.

While growing up in Duki, Jameel was constantly discouraged from pursuing an education. His neighbours and relatives called it a waste of money and expected him to earn a living to support his family. With a determined spirit and his parents' support, Jameel did not deter from his path and applied to LUMS, where he secured a 120% scholarship through the National Outreach Programme.

"I'm the first girl in my family from Ibrahim Goth to travel to get an education. This would not have been possible without the NOP."

Iqra Saleem

Class of 2018

Assistant Director, State Bank of Pakistan

Born and raised in Ibrahim Goth, an urban slum of Karachi, Iqra, from a young age, helped her mother stitch clothes to help her family make ends meet. However, despite daunting financial barriers, her passion to succeed in school never wavered. She excelled in her Matric and FSc examinations, and qualified for the National Outreach Programme (NOP) summer coaching session at LUMS.

Her commitment and hard work paid off when she secured admission to the BSc Accounting and Finance programme in 2014. Four years later, Iqra graduated with exceptional marks, ranking among the top 10% of her class.

The Baltistan Experience is Returning in Summer 2023!

In July 2022, LUMS and the University of Baltistan, Skardu (UoBS) came together in Skardu for ‘Learning Without Borders – The Baltistan Experience’, where nature was the classroom for students from both universities.

Tucked in the foothills of the Karakoram mountains, Baltistan is Pakistan’s hidden treasure. Described as the ‘third pole’, the region is home to a rich ancient culture, breathtaking views, abundant produce, and diverse flora. It is a hub for tourists and trekkers worldwide. At its heart is the scenic city of Skardu.

Skardu’s rich culture, landscape, and heritage served as the perfect backdrop to realise that collaboration is the key to solving the biggest challenges of our time. The collaboration has already had considerable impact, from knowledge sharing to building cross-cultural intelligence. Moreover, data that faculty and students collected during the courses has provided solutions to some of the unique challenges faced by surrounding villages and the broader global questions of health, ageing and climate change.

For example, to counter the extended (12+ hours) power shortages, students in the Energy course designed low-cost and sustainable alternatives such as low-voltage lithium batteries. They installed these in the only medical operating theatre in Skardu which kept power running 24/7. Their solution has meant that lifesaving surgeries are no longer postponed due to lack of power. This partnership and its resulting innovations showcase that small, student-led

interventions can make a big difference to regional development. Collaborative, educational programmes like these can be scaled up in other areas to further develop and preserve the hidden treasures of our world.

We invite you to partner with LUMS to be a part of this groundbreaking collaboration.
